A royalty on all chanks entered for exportation is levied under Ordinance 18 of 1890 and Notification dated August 26, 1891.

2.—PORT, HARBOUR, WHARF, AND LIGHTHOUSE DUES.

Port Dues are levied at all ports, except Colombo, under the Ordinances 17 of 1869 and 14 of 1871. The rates are 8c. per ton inwards and 8c. per ton outwards on loaded vessels. At Colombo, Harbour Dues are levied under Ordinance 6 of 1875, section 8, and Proclamations of November 7, 1882, May 6, 1885, March 24, 1887, and November 18, 1887, on ships entering the port, on ships discharging or loading cargo, and on Imports and Exports. Under this head are also brought to account receipts for the hire of Government boats and moorings, and half pilotage fees recovered under the Ordinance 6 of 1865. For Colombo Harbour a special tariff for pilotage was published under Proclamations dated June 12, 1884, March 20, 1886, and January 19, 1892.

3.—EXCISE, LICENSE, AND INTERNAL REVENUE NOT OTHERWISE CLASSIFIED.

Excise.

Salt.—The salt revenue is a Government monopoly; but in the Jaffna District of the Northern Province the monopoly is occasionally rented out annually; the renter who purchases the monopoly of the retail sale being supplied by Government with salt at 40c. per cwt., which he is allowed to retail to the public at Rs. 2.24 per cwt.

The proceeds of all salt sold in the manufacturing districts in the Northern, Eastern, North-Western, and Southern Provinces under the Ordinance No. 6 of 1890 are brought to account. By Ordinance No. 14 of 1857 the importation of salt into this Island is allowed on payment of a duty of Rs. 2.13 the cwt.

Salt is also sold for export to released districts and for export beyond sea at Rs. 5.25 per ton.

In all the other salt manufacturing districts salt is sold exclusively by Government to retailers and wholesale dealers at Rs. 2.36 per cwt.*

Arrack, Rum, and Toddy.—The exclusive privilege of retailing spirits distilled from the palm tree, and arrack rum, and toddy, generally farmed in the several Provinces—regulated by the Ordinances 10 of 1844 and 13 of 1891.

† *Duty on Arrack and Rum Stills.*—Under this head are brought to account sums received for licenses issued to distillers of and wholesale dealers in arrack and rum, under the Ordinances 10 of 1844 and 13 of 1891. The license is granted by the Government Agents on the payment of the sum of Rs. 100, and is in force from the date of such grant until the 31st day of December next thereafter.

Licenses.

‡ *Opium.*—Rs. 50 for a license to possess opium, Rs. 250 for a license for selling opium and bhang by wholesale, Rs. 200 by retail in Colombo, and Rs. 100 elsewhere. The fees are levied under Ordinance 4 of 1878.

§ Stamp duty on professional and trading licenses is also included under this head.

|| *Licenses to dig Plumbago.*—The lessee pays for a lease of one acre for the term of one year the sum of Rs. 10 in advance, and further one-tenth part of all plumbago dug on the premises demised during the continuance of the lease, or a sum equal in value to such proportionate amount. Such further sum to be paid on or before the day of expiry of the lease. This amount is collected by the headmen.

Land Revenue.

|| *Rent or Tax on Paddy.*—The receipts classed under this head are derived from the rent or tax—usually one-tenth or one-fourteenth—of the produce of all lands cultivated with rice. In the Western and Southern Provinces the share of the produce of rice lands payable as rent or tax is, however, in many cases, one-half or one-fourth, and sometimes one-third, one-fifth, one-eighth, and one-twentieth; the differences in the rates being due to the different circumstances under which the particular lands were granted by successive Governments. Under the Dutch a large area of rice land was held in return for personal services under the title of “accommodessans”—a tenure which was commuted by the Proclamations of September 3, 1801, and April 22, 1803, for a tax of one-fifth of the produce. In the Provinces which formed the old Kandyan kingdom the tax is universally one-tenth or one-fourteenth, and is levied under the authority of the Proclamation of November 21, 1818. The tax in the Sinhalese maritime provinces was, until the passing of the Ordinance No. 11 of 1878, farmed under the provisions of the Ordinance No. 14 of 1840 to renters. In the Northern and Eastern Provinces, under voluntary agreement with the cultivators, a money payment replaced the tithe to some extent. Since the enactment of Ordinance 11 of 1878 the tax has been commuted for a money payment

* To encourage fish-curing in Ceylon the price of salt has been reduced, the rate being 80c. to 8c. 1 per cwt. instead of Rs. 2.36: Notification dated September 1, 1895. The price has been further reduced to 45c. per cwt., exclusive of the cost of transport to the fish-curing yards, which will remain as heretofore: Notifications of May 6 and July 1, 1890.

† The duty is recoverable in stamps under the law, and is consequently accounted for under “Revenue Stamps.”

‡ Under the provisions of the Ordinances 17 of 1865, 7 of 1876, and 4 of 1878, the collections within Municipal towns and in towns in which Local Boards of Health and Improvement have been established have been transferred to the Municipalities and Local Boards.

|| The rent or tax on paddy has been abolished by Ordinance 4 of 1892, which came into operation on December 31, 1892.

throughout the Western, Southern, and Eastern Provinces. In the Northern Province the farming of the tax and the voluntary commutation continue side by side. In the Kandyan districts, consisting of the Central Province and the Province of Sabaragamuwa, the Kurunegala District of the North-Western Province, the North-Central Province, and the Province of Uva, the tax was in the early times of the British occupation collected in kind: this system was replaced between the years 1827 and 1832 by a voluntary commutation for a money payment, which, however, was not renewed in the North-Western Province after 1832, or in the North-Central Province after its separation from the Northern Province. In the two last-named districts the tax is now farmed. The greater part of the Central Province, the Province of Sabaragamuwa, and part of the Province of Uva have been recently placed under the provisions of the Ordinance No. 11 of 1878. Part of the Central Province is voluntarily commuted, and in part of the Province of Uva the tax is now farmed.

Royalty on Cabook Stones, &c.—A payment of Rs. 3.75 is levied on every 1,000 cabook stones cut from the Government pits in the Districts of Colombo and Negombo; of 50c. per 100 cubic feet of sandstone quarried between Hendala and Pamunugama; and 6c. on every cart load of white sand removed from the Maradana cinnamon gardens.

This head embraces the amount for which the Government farms out the privilege of collecting the tolls leviable at the different roads, bridges, ferries, and canals, and the lock at St. Sebastian, under the Ordinances 14 of 1867 and 12 of 1887.

In the Western, North-Western, and Central Provinces an allowance at the rate of 25c. a day for each patient treated in the Government Civil Hospitals is recovered from the person who sends the patient to hospital, in aid of the expenses incurred for his subsistence; and in the Western Province contributions by families to the subsistence of lunatics are brought to account under the provisions of the Ordinance 1 of 1873.

Medical aid dues levied under Ordinance 9 of 1882.

Proceeds of stamps in judicial process in District Courts, Courts of Requests, and Police Courts, under the provisions of Ordinance 3 of 1890, and Stamp Duties levied under the Land Registration Ordinance 14 of 1891.

Warehouse rent charge upon goods placed in the Queen's Warehouse levied by Government notices dated October 20, 1876, July 6, 1877, and December 2, 1887, under authority of the 13th clause of the Ordinance 17 of 1869.

An assessment tax, generally 5 per cent., on the annual value of all landed property within towns, forts, and gravets, levied under the provisions of the Ordinances 16 of 1865, 19 of 1871, 3 of 1875, and 7 of 1880. (See pages 30 and 31.)

2. By the sale of the produce of the Botanic Gardens, Peradeniya, and crops on Crown land.
3. By the sale of Delft horses.

The regulations for the protection of the pearl banks are the Dutch Proclamations of May 28, 1665, and November 15, 1745, and the Regulation 3 of 1811. The Ordinance 18 of 1843 prohibits the possession within certain limits of certain nets which might otherwise be used to the detriment of the banks.

HIS EXCELLENCY is also pleased, on the recommendation of the Superintendent of Wrecks, to approve of the following Regulations for the guidance of Receivers :—

1.—*Receivers will bear in mind that the principal object of the Ordinance 5 of 1861, and of their appointment thereunder, is—*

- 1st—The rendering of assistance.
- 2nd—The protection and preservation of wrecked property and the restoration thereof to the owners.
- 3rd—The protection of the Customs revenue.
- 4th—The settlement of salvage claims.

The provisions of clauses 3, 7, 8, 14, 16, 17, 21 to 27, and 31 to 32 give them full powers to carry out these objects.

* Cancelled by Minute of October 20, 1888.

2.—*Inquiries into Wrecks and Casualties at Sea, clause 3 ; Ships in distress, clause 14.*

In making these inquiries the officer will remember that he is exercising a highly important function, and that his report may be the foundation of proceedings deeply affecting the interests of individuals. He must therefore most carefully endeavour to arrive at the truth, and should especially direct his attention whether the casualty happened from avoidable or unavoidable causes,—particularly as to the (a) unseaworthiness or insufficient equipment of the ship; (b) insufficient or improper manning; (c) improper loading, overloading, bad stowage; (d) misconduct, incompetency, or neglect of master, officers, or crew; (e) ignorance of lights, or navigation of the coast; (f) neglect of heaving the lead.

3.—*Custody of wrecked property, clauses 9, 16, 17, and 18.*

Clause 9.—This clause refers to property recovered from a ship wrecked or in distress at the time of wreck or casualty, and the object of its provision is to secure the property in the confusion which attends a shipwreck; to protect the Customs' revenue; to provide for payment of fees, expenses, and salvage claims. But if the master, or if the owner, or any duly appointed agent of owner or master is in possession, and is able to take and keep custody of the property, and if all claims are paid or provided for by proper security, the Receiver need not take possession or detain the property, but he will offer his services and render such assistance as may be required.

Clauses 16 and 17 refer to wreck saved or taken possession of at any other time.

Clause 18.—This notice should be given when the wreck in custody exceeds the value of Rs. 50, and the particulars of all articles taken possession of by the Receiver will be entered in the Report Book No. 1, per form annexed.

4.—*Wreck arrested by order of Court of Law.*

When a derelict ship in the custody of a Receiver, or other wrecked property detained by the Receiver for the payment of salvage, is arrested by virtue of a warrant or other instrument of Court, the Receiver should not give up the claims to fees and to any expenses he may have incurred, but should send a copy of his account to the person taking such charge, giving notice of his lien, and that the property must not be restored until the amount of his claims be paid. A copy of the account and notice should also be forwarded to the Registrar or Secretary of the Court issuing the warrant; and in the event of property being restored without payment of Receiver's claims, he should report the circumstances to the Superintendent of Wrecks, and should resume possession of the property until his claims are satisfied.

5.—*Sale of Wreck Property, clauses 19, 27, and 28.*

Clause 19 provides for the disposal of wreck of small value, derelict, flotsam or jetsam, so constantly found on the coasts of this Island; and should the Receiver find it necessary to sell property under the provisions of clause 27, he will, if the property be claimed, endeavour in doing so, if possible, to act in concert with the owners and insurers.

All sales of importance and value should be advertised in the *Gazette* and local papers; and notice of intended sale affixed at the Custom House of the Port. The account of wreck sold is to be made in form No. 3 (annexed).

6.—*Salvage clauses 21 to 26.*

The decisions of questions as to salvage, if the parties cannot agree, must be determined by the Court having jurisdiction in that behalf; but the Receiver has important duties in endeavouring to settle salvage claims amicably, in providing for what may be due by detaining the property saved; in releasing the property on proper security being given; in selling the property, when necessary, to satisfy the claim of salvors; and in apportioning money paid in satisfaction of such claims; and the Receiver will recollect that, whilst providing for the claims of *bonâ fide* salvors, he must, as far as he can, protect property against vexatious and improper claims.

The essentials of salvage service are—(a) the degree of danger from which the lives or property are rescued; (b) the value of the property saved; (c) the risk incurred by the salvors; (d) the value of any property by the use of which the services are rendered, and the danger it was exposed to; (e) the skill shown in rendering the service; (f) the time and labour occupied.

The salvage should be in proportion to the use of these essentials; but where scarcely any, or only the last exist, and the same is little more than mere work or labour, it should be rewarded accordingly.

The amount of reward should not however increase in direct proportion to the value of the property; and as a general rule it may be borne in mind that the Courts of Admiralty very seldom, if ever, give more than one-half the value of the property saved.

7.—*With a view to encourage salvors and finders of unclaimed wreck and drift goods sold and taken charge of by Receivers under provisions of clauses 19 and 28, the following rewards may be given, viz. :—*

Upon the net value of property of Rs. 25 or under (two-thirds)	-	-	-	$\frac{2}{3}$
When it exceeds Rs. 25 and under Rs. 50 (one-half)	-	-	-	$\frac{1}{2}$
When of Rs. 50 and above (one-third)	-	-	-	$\frac{1}{3}$

8.—*Delivery of Property to Owners.*

On payment of all sums due for salvage, duties, fees and expenses, the Receiver will deliver up all property which comes into his possession or custody, and the proceeds of such parts of it as may have been sold, to any person who proves himself to the satisfaction of the Receiver to be the owner of such property, or agent duly appointed by him, taking receipts for the same. The owner of the ship being responsible for the cargo, and the master of the ship having, as the servant of the owner, the legal custody thereof, the Receiver will treat the master, when present, as the agent of the owner—not only of the ship, but also of the cargo; unless and until it is clearly proved that the owners of either have put an end to such agency.

9.—*Accounts and Returns.*

The Receiver will keep a Report Book according to form No. 1, in which he will enter the particulars of every description of article taken into his custody. The reference numbers are to commence with No. 1 on January 1 of each year.

The reporting of goods taken possession of for the Receiver should be made according to form No. 2, and the sale account per form No. 3.

The Quarterly Returns, as per form No. 4, are to be forwarded through the Superintendent of Wrecks; and the net proceeds of all wreck, the property of Government as unclaimed, is to be paid into the General Treasury quarterly, the Treasurer being required to receive such moneys on account of wrecks.

Remarks.

Decrease only apparent—the receipts of 1896 include a portion of the Medical College fees recovered in that year and included under “Sundries” in 1897.

Decrease due to the cost of printing for Government Departments being met from an advance.

Increase probably due to prompt recovery of rent.

Increase due to general prosperity.

Decrease only apparent—the receipts of 1897 represent the collections of these quarters only while the collection of four quarters are included in the receipts of 1896.

Receipts under this head in 1896 were included under “Other Collections.”

The receipts of 1897 include a sum of Rs. 48,820·33 recovered from the Indian Government on account “Transit Mails,” from 1st January, 1895 to 31st December, 1896.

} Continued increase in Railway Receipts generally, due to the well known cause that the advantages of the Railway are universally appreciated : and to the expansion of tea cultivation, &c.

Increase due to the lease of the Cinnamon Gardens, Colombo, having realized a higher price.

Decrease due to a smaller extent of chena land cleared by villagers in the North-Central Province in 1897.

Increase chiefly due to larger investments in Indian Government paper.

The increase is only apparent—the receipts of 1897 include a portion of the interest for 1896.

The decrease is mainly due to the Municipal Council, Kandy, the largest contributor to the Revenue under this head, having paid the interest for the 2nd half-year of 1895 and for 1896 in the latter year.

The receipts of 1897 were abnormally large, and include a sum of Rs. 202,951 credited to meet surcharge owing to an irregular course adopted in bringing to account the sums drawn by the Railway Department for expenditure on account Votes in 1896.

A sum of Rs. 44,538·04, being profits on new coins received in 1897, was brought to account in 1898.

Increase due to recoveries on account of “Transit of Mails.”

Increase due to larger sales of timber and firewood.

Increase due to larger land sales.

Increase due to larger settlements of leased lands in the North-Western Province.

The duties of the Attorney-General are not clearly defined, but are in many respects analogous to those of the Attorney-General in England, though in some respects they resemble those of the Lord Advocate in Scotland. He acts as Legal Adviser to the Executive and every Department of Government. All Contracts and Deeds affecting the Government are prepared or settled by him; and he prepares all the Legislative Enactments of Government. He acts as Public Prosecutor, and instructs Magistrates in criminal proceedings. RETURN OF PRISONS AND PRISONERS.

Replies to the Questions, compiled from the Returns of the respective Superintendents.

QUESTION I.

If the prison is on the separate system, is the separation complete? And if not, what is the separation enforced by day and night, respectively?

All the penal stage prisoners of the Island if sentenced to over a month are passed through one of the following jails:—Welikada, Kandy, Jaffna, Ratnapura.

In these jails the penal stage prisoners are worked on the separate system. They are confined in separate cells, and are worked in stalls. They are marched from their cells to the stalls in single file three paces apart, and are not allowed to speak or communicate with each other at all. Prisoners not in penal stage are not worked on the separate system.

QUESTION II.

If not on the separate system, what provision is there for the supervision of the prisoners while in association?

The males are supervised by male officers of various grades, and the females by matrons, in all jails.

QUESTIONS III. AND IV.

How many cells are there; and how many associated wards? Taking the *average* number of prisoners in jail, how many cubic feet of space are there for each prisoner during the hours of sleep?

- (1) Males, convicted, who are subdivided as follows:—
 - a Penal stage, lasting for 3 months.
 - b Class IV. " 9 "
 - c Class III. " 12 "
 - d Class II. " 12 "
 - e Class I. rest of sentence.
 - f Road Ordinance defaulters.
 - g Simple imprisonment.
- (2) Females, convicted, in same class as males.
- (3) Males, unconvicted, who are subdivided as follows:—

 - b Debtors, private.
 - c Persons committed in default of bail, witnesses, &c.
 - d Persons committed for further examination.
 - e Persons committed for trial by Superior Courts.
 - f Persons committed to await sentence and pending appeal.
 - g Accused persons arrested on warrants in transit to other stations.
 - h Suspected lunatics committed for medical observation.

[At Colombo, Kandy, Galle, Jaffna, and Batticaloa no lunatics are now committed to prison, proper and separate Houses of Observation having been provided, which are placed under the control of the Medical Department.]

- (4) Females, unconvicted.

QUESTION VI.

Is penal labour—that is, labour by treadmill, crank, or shot-drill—in force?

The penal labour consists of beating coir husk and metal-breaking. Treadmill work is carried on in Welikada, Pingo-carrying in Welikada, Jaffna, Kandy, and Kurunegala.

QUESTION VII.

If so, during what periods of imprisonment, in respect of what classes of prisoners, and during how many hours, is such penal labour enforced? In stating hours of treadwheel labour, give, first, the total time on and off at the wheel, &c.; secondly, the length of spells and intervals of rest.

This penal labour is enforced during the penal stage, and also in the cases of prisoners reduced to the penal stage as a punishment. Lengths of spells and intervals for treadmill work, 8 minutes on and 8 minutes off.

QUESTION VIII.

What kind of labour, other than penal labour, is in use?

With the exception of a small number reserved for jail service, the prisoners were employed as carpenters, sawyers, blacksmiths, tinkers, masons, sweepers, tailors, fencing and weeding, hospital attendants, cabook-cutting, making brooms, building quarters for jail officers and making additions to jails, repairing jail officers' quarters, harbour works and twisting rope.

QUESTION IX.

If the prisoners are employed beyond the walls of the jail, state—

(1) On what kind of work they are so employed?

At *Anuradhapura*, in building dāgaba, brick-making, quarrying, and transporting stones.

(2) How are they supervised?

By Superintendent, Assistant Superintendents, Jailers, Deputy Jailers, Overseers, Sub-Overseers, and Guards.

At Mutwal teachers appointed by Government devote two hours in teaching every Sunday.

- Leper Asylum, Hendala.*—An ample supply. Town supply from Labugama; the Kelani river in the vicinity of the hospital. The quality of the water from the town supply is pure and good; the river water serves the purpose of ablution, &c. There are nine bathrooms in connection with the Asylum supplied with hot and cold water, according to the requirements of the patients. The dry-earth system is in use in well-constructed latrines, in which metal pails are placed as receptacles for the excreta, and a quantity of coir-fibre dust reserved for the purpose of deodorization. The latrines admit of the utmost cleanliness and free ventilation, and are constantly whitewashed and disinfected. The sewage is removed twice a day and incinerated in "Silchar Cinerator" at a distance from the wards.
- General Hospital, Colombo.*—*Ad libitum.* The Labugama springs. Excellent. Dry-earth closets in detached buildings; baths also in detached buildings. Dry-earth.
- Lady Havelock Hospital, Borella.*—The quantity of water available is unlimited. The reservoir at Labugama. Good (usable). There are six bathrooms, and to each bathroom there is a tap three-quarter inch wide, and in some a one-inch, which conveys the water from the pipes. The dry-earth system is in use, and is carefully carried out. The night soil is removed daily and buried in the jungle about two miles from town.
- De Soysa Lying-in Hospital, Maradana.*—Unlimited supply. Labugama water supply. Good; water for drinking purposes is filtered before use in patent porcelain filters. There are two outhouses, one on each side, connected with verandah. In each range there are dry-earth latrines and bathrooms, the latter being used as lavatories. No sewers. Open cemented drains for surface water only. Dry-earth latrines emptied twice a day.
- Panadure.*—Unlimited. From a well in the hospital premises. Good. There are two lavatories, one for males and the other for females. Each of these has two cemented tubs. The dry-earth system is in use. The buckets are removed twice a day, and the contents buried far away from the hospital. Each privy contains two zinc buckets.
- Kalutara.*—Unlimited. Two wells on the premises. Good, is always filtered before use. There are two baths attached to the latrines at the end of each ward, water being conducted by iron pipes to two of the bathrooms. Latrines, the dry-earth system in a satisfactory condition, excreta being removed for burial by coolies.
- Negombo.*—Sufficient for ablution and drinking purposes. A well in the vicinity supplies the drinking water. Two wells in the hospital grounds supply the water for bathing. The drinking water is of good quality. Each ward has a bathroom furnished with a large tub. The tubs are filled daily from the wells in the premises, and all patients who are able to leave their beds are bathed twice a week. The dry-earth system is enforced. The latrines are in very good condition, and can easily be kept clean. The excreta are removed twice daily and buried after disinfection.
- Avisavella.*—Unlimited. A well in the hospital premises. Good and fit for drinking purposes. It is boiled and filtered before use. There are two bathrooms for males and one for females connected to the respective wards by corridors. Latrines adjoin the bathrooms and are on the dry-earth system, the excreta being removed twice daily and buried at a distance from the hospital.
- Neboda.*—Unlimited. A well in the hospital premises. Good. Patients who are convalescent bathe in a stream adjoining the hospital. There are three bathrooms, two for males and one for females. Those who are not quite fit to bathe out in the open air at the stream have their baths in these rooms. System adopted, dry-earth. The contents of the buckets are buried at some distance from the hospital in the sea.

CENTRAL PROVINCE.

- Kandy.*—Unlimited. Water is supplied by the Municipality, and comes from a mountain stream connected by pipes with the hospital. Good. The water is filtered before use. One large bathroom for native males and another for females. There are also three others for European patients and officers and nurses of the hospital. There is a main sewer under ground. The privies are all on the dry-earth system; the contents are incinerated in two pits, at each end of the hospital grounds, at a distance from the wards: this system works very satisfactorily without causing the slightest smell.
- Katugastota.*—*Ad libitum.* A well in the hospital grounds for drinking purposes. Good. The patients bathe in the Mahaweli-ganga as before, which they prefer to the bathroom. The dry-earth system is in force. The night soil is removed twice daily or oftener and buried in the hospital burial ground, which is a good way off.

- Mantota.**—As much as each patient requires. Water for drinking is procured from a well in the village by the contractor, who is paid at half a cent per gallon. Good. Boiled and filtered in chatty filters before being used for drinking purposes. The patients are bathed in tubs placed in the bathrooms attached to the latrines. There are two such bathrooms, one for males and the other for females. The tubs are always kept filled with water by the hospital servants. The bathrooms are also provided with towels and soaps. There are two latrines conducted on dry-earth system, one for males and the other for females separated from the wards. The excreta are disinfected and removed twice daily or oftener, when necessary, and buried in the jungle at a considerable distance from the hospital. The latrines are always kept clean.
- Point Pedro.**—As much as each patient requires. From two wells in the hospital premises. Clear, transparent, and wholesome. It is for drinking purposes. Each sex is provided with a well-constructed outhouse, divided into two compartments, one being used as a latrine and the other, with a cemented cistern in it, as a bathroom. There are only two latrines, one for each sex, conducted on the dry-earth system. The excreta are disinfected and removed twice daily or oftener, when necessary, and buried at some distance from the premises.
- Mannar.**—About ten gallons. Transported from a well about two miles from the hospital by a contractor, who was paid at 67½ per 100 gallons. Quality of the water is good. There are no bathrooms, and the patients bathe by the side of the well in the open air when they are fit to do so. Dry-earth system in use, and the excreta being removed daily and buried at some distance from the hospital.

Vankalai.—Unlimited supply of water. Drinking water is supplied by a contractor from a Government well at about a mile from the hospital. For other purposes water is obtained from the temporary well by the side of the hospital. Drinking water is good, the other is slightly brackish. No bathrooms; patients bathe by the side of the temporary well when they are fit to do so. Dry-earth system is used. The excreta being removed twice a day and buried at some distance from the hospital.

Puliyadi-irakkam.—Unlimited. River and well. Not good in quality; water is boiled and filtered before use. The convalescents go to the river also for bathing. Dry-earth system. There are separate latrines for males and females. The excreta are removed twice daily and buried.

SOUTHERN PROVINCE.

Galle.—Sufficient for all purposes. Water for drinking is procured from a well at Labuduwa, a village situated about three miles from town. For other purposes water is taken from a well in the premises. That obtained from Labuduwa is pure and wholesome. The water from the well in the premises is hard and brackish and used only for washing purposes. There are separate bathrooms for males and females, with tubs. Hot and cold water being used according to the requirements of the patients. There are latrines in connection with each ward, which are conducted on the dry-earth system. They are always kept clean and in good order. The excreta are removed at night by the Municipality and buried about four miles away from the hospital.

Hambantota.—About three hundred gallons of water are supplied daily to the hospital, a sufficient quantity being available for each patient. A well a short distance from the hospital at the foot of the sandhills. Good. A bathroom provided with two large wooden tubs, which are filled regularly every morning for the use of patients. The night soil is removed daily and buried out of town.

Batapitiya.—Unlimited. A well in a private ground a few hundred feet opposite the hospital. Pure and wholesome. The drinking water is filtered before use. There are two baths for the male and female patients, but patients prefer bathing in the sea close by, or at the well a few hundred feet away from the hospital. There are no privies. There is a dry-earth latrine for male and female patients respectively. The night soil is thrown into the sea.

Tangalla.—A sufficiency. Two public wells in the town. Good, after boiling and filtration. A bathroom and tub. Open surface drains of brick faced with cement.

There are two bathrooms for the use of the patients. There are no privies, but there are two latrines conducted on the dry-earth system.

Trincomalee.—A sufficient quantity. From a well in the hospital ground. Good in the rainy season, brackish in dry weather. There are two bathrooms, one for males the other for females. The tubs are filled by the hospital servants. There are no privies. The dry-earth system is in operation. The buckets are cleaned out twice a day, and the contents buried in the sea beach.

Kalmunai.—An unlimited supply, except during the dry season, when the water is supplied by the contractor, but we had no occasion to buy water from the contractor during this year. From three wells within the premises. Pure, and good for all ordinary purposes. Drinking water boiled and filtered before use in patent porcelain filters. Each ward has a bathroom attached to it. There are no sewers or open drains. Each ward has a latrine separated from it, and conducted on the dry-earth system, with a liberal supply of disinfectants. They are kept scrupulously clean, and the excreta are daily removed and buried at a good distance from the premises in the jungle near the sea.

NORTH-WESTERN PROVINCE.

Kurunegala.—A gallon of filtered water for cooking and drinking, and thirty-two gallons of water for bathing. Two wells in the hospital premises. Pure and good. The drinking water is boiled and passed through sand and charcoal in chatty filters before use. Tubs placed in the bathroom are available for warm baths. Patients prefer to bathe in a stream passing by the hospital. Rubbish, &c., are daily collected and removed from the premises by the scavenging cart. The dry-earth system is in use in the latrines, and the contents of the buckets removed twice a day and buried in an estate near the hospital.

Puttalam.—Ample quantity of fresh water. A cistern in the hospital to which water is conducted by pipe from the fresh water reservoir about half a mile from the hospital. Good appearance. There are two bathrooms, one for males and the other for females, with a tub in each. Cemented surface drains round the wards to convey stream water. There are no privies. Two latrines conducted on dry-earth system, one for males and the other for females. The night soils are disinfected and removed twice daily for burial at some distance from the hospital.

There are two bath-rooms, one for males and the other for females, the bathroom for the males being supplied with a cistern and the bathroom for females with a tub. Chilaw.—In sufficient quantity. From a well outside the hospital. Impure, but boiled and filtered before use. The patients bathe outside of a cistern near the latrine. There are two dry-earth latrines.

Nikaweratiya.—Except in time of drought, no restrictions as to quantity used necessary. Hospital well. Very slightly brackish. Clear. Water is always boiled and filtered before use. The hospital is provided with a male and a female bathroom, and they are used when necessary. Patients, however, prefer bathing by a channel which rises from the tank and courses by the side of the hospital grounds. The attendants have strict injunctions not to allow patients to bathe inside the channel, but to draw out water for them. Two dry-earth latrines. The excreta are removed once a day, and when necessary oftener, and buried at a suitable distance from the hospital.

Dandugamuwa.—An unlimited supply. A well in the premises. Good, but slightly saline during a drought. It is always boiled and filtered before use. There are two bathrooms connected with the wards by covered ways. The floors of these rooms are of mud and there is no exit for water. They are therefore unsuitable and have never been used for the purpose they were intended to serve. Patients who are able to go about prefer to bathe in a stream close by to the hospital. There are two tubs which are filled with cold or warm water to suit the requirements of the rest of the patients. The drains are all natural surface drains. They are unpaved. There are no privies. There are closets on the dry-earth system. These closets are also attached to the wards by covered ways and adjoin the bathrooms. The floors of these rooms are also constructed of mud, and the aloine and renal discharges often soak into the floor. They are however disinfected in the best manner possible. The excreta are removed twice daily and are interred at a safe distance in the neighbouring jungle.

NORTH-CENTRAL PROVINCE.

Anuradhapura.—The supply of water is unlimited for all purposes. Two wells in the hospital premises. Good. The water for drinking is boiled and filtered through chatty filters, the contents of which are frequently renewed. There are three baths, one for males and two for females. There are no privies. Separate latrines on the dry-earth system are provided for males and females; the excreta are removed twice a day and buried in a plot of jungle at a short distance from the hospital.

Mihintale.—Three or four gallons for each patient. Transported by a contractor from a well for drinking and from a tank for bathing purposes. Well water is rather brackish, otherwise good. Tank water is muddy and polluted by people by bathing and washing. Patients bathe in hospital premises. There are two bathrooms, one in the female ward and the other in the parangi ward. A tub is kept for the patients of the male ward. Dry-earth system. The night soil is removed by the latrine cooly and buried about two-hundred yards away from the hospital premises.

PROVINCE OF UVA.

Badulla.—Unlimited. A cistern, which is supplied from a spring. Drinking water has been pronounced to be good by the Public Analyst. Bathing water drawn from the cistern supplied from a spring. Eight bathrooms with water laid on through pipes. Surface drains. Eight latrines on the dry-earth system. Night soil is removed daily and buried in the hospital grounds.

Haputale.—Unlimited. From a stream in the forest adjoining the hospital. Good. Water laid on to hospital by pipes. Dry-earth system. Condition of the privies good.

Lunugala.—Very uncertain; sometimes a quantity sufficient for all purposes; at other times hardly any water at all. The water is diverted from a stream about a mile away from the hospital into an open channel, and through it into a reservoir, and distributed by pipes. It is liable to be polluted. There are two bathrooms. Dry-earth system. Night soil is removed three times a day and buried in the jungle.

Alutnuwara.—Unlimited. The Mahaweli-ganga, on whose right bank the hospital is situated. Good. There are two permanent bathrooms for convalescent patients, the rest bathe in the river below the source of supply for drinking purposes. The dry-earth system. The latrines are in good order.

Medagama.—Unlimited. A stream running by the hospital premises. A well is being completed for the use of next year. Fairly good. Water is always boiled and filtered for drinking purposes. The patients bathe in the stream. No lavatories. No sewers. Privies are on the dry-earth system. Cleaned daily, and free from any offensive smell.

Hambegamuwa.—Ample; about six gallons for each. From a tank filled in with rain water. Unwholesome; containing vegetable matter. Water for drinking purposes is boiled and filtered. The patients bathe in a stream which takes away superfluous water from the tank through the hospital premises. The excreta are buried. The privies are usually kept clean.

PROVINCE OF SABARAGAMUWA.

Ratnapura.—*Ad libitum*. Ratnapura reservoir. Very good. One bathroom for males and another for females. A good many patients bathe in the river. Latrines on the dry-earth system. The excreta are buried far away from the hospital.

Kegalla.—One gallon of filtered water for cooking and drinking, and thirty-two for bathing. A well in the adjoining compound. Pure and good. The drinking water is passed through a sand and charcoal filter before use. A tub is placed in the bathroom, which is available for cold and warm baths. Patients also bathe in a stream which is close to the hospital. The dry-earth system is in use in the latrine, and the contents of the buckets are removed and buried twice daily at a distance from the hospital.

Rakwana.—Unlimited. Drinking water is obtained from the Rakwana-ganga which runs past the hospital. An irrigation elu runs round the hospital; the water from this is used for flushing drains and for washing wards. The construction of a well a few yards from the hospital was commenced. The river water is of good quality. It is boiled and filtered previous to use. Each ward is provided with a bathroom containing a zinc tub, which is filled every day by the latrine cooly. Each ward has two dry-earth latrines in connection with it. The excreta are removed twice a day and buried at a distance from the hospital.

Balangoda.—*Ad libitum*. During the rainy season water is obtained from a well about a few hundred yards from the hospital, and during dry weather the well dries, and water has to be obtained from the Walawe-ganga. The water from the well is supposed to be pure. Water is always boiled and filtered before use. There are four bathrooms in the hospital for the use of the sick. Convalescent patients bathe in the Walawe-ganga, which runs about 80 yards below the hospital. There are five latrines on the dry-earth system for the use of the sick. The excreta are daily removed and buried at a distance from the hospital.

Karawanella.—An unlimited quantity. A well in the hospital grounds, and the Kelani river in the vicinity of the hospital. Pure. Well water alone is filtered for drinking purposes. There are separate bathrooms for males and females, with tubs, and a special stove exists for hot water baths in connection with two of the bathrooms; the Kelani river also in the vicinity of the hospital affords convalescent patients a resort for bathing. Dry-earth system. The excreta are removed and buried daily at some distance from the hospital.

Godakawela.—Unlimited. A well in the premises. Good. A bathroom for each sex, provided with a wooden bath tub. The majority of the patients go to a stream close by for bathing. The dry-earth system. The buckets are removed twice daily and their contents buried.

Kolonna.—A fair quantity. River behind the hospital. Fair. Water carried in buckets to the bathrooms. Dry-earth system.
